Jul 21, 2022 Version 6.9.1 Minor fixes for improved functionality Its a good app but i cant count how many times my images i print out for my clients tattoos were either too big or too small not due to client but due to the fact for example ill want a 6in image i have to guess and hope for the best im using the PocketJet 773 airprint the app doesnt show a reality layout of the paper i wish the app had a ruler for width and length on bottom and one side for the actual measurements of paper so you can size and edit it accurately also app doesnt have a label to show which side is the top or bottom of sheet that leads to my next concern I dont understand why we cant add multiple images in one sheet you gotta keep rerunning for each image and thats when the problem with which is up and down ive printed out a image over another image several times because ill forget which is top or bottom of layout a app update on that would be fantastic honestly I would rate the user interface as eAAineAA by 2009 standards, and just not up to date compared to today, but this app works shockingly well for faxing out, scanning to Files app One for ma), printing (although usually only use airprint natively in files) and the misage/ink for my brother MFC J480DW of 7 years in my iPad Pro 3 11 a.~ in execution 15.4. 1. The fact that I can do this relatively without problems from my iPad to my old printer in a different VLAN subnet is increased great\*. Four stars to do the job reliably and in some cases above expectations (mostly), but not five because Chico hurts to look. \*Since MDNS and, therefore, Bonjour is a multidifusion service, the printer is only "visible" for things in its own subnet; You must make Avahi reflector execute in some place of your network to cheat and bounce the Bonjour mdns packages between the subnet for the intervlan routing, even if your Firewall intervenes is correctly configured, or the application will not see that the printer is announced and, therefore, it is not. Know how to find it; The same with AirPlay and Airprint and Roku through the subnets. Once Avahi reflects packages between the subnets, she will be free from home. Be sure to establish the size of Avahi's caché in 0 or the names of the printer and the devices begin to be really funky after a few weeks. I decided to update my HP work printer of more than 8 years old to Brother Inkvestment. The printer in Sâ has superior printing/scanning functions in comparison with my last printer, but I loved the HP application. I scan almost all paper documents in my home and printed a lot for work. The scan function of the HP application is so increased and I do everything in my phono. Even the interface on the old LCD HP screen in my previous printer was something modern and very intuitive. Why is Brother a) so outdated and b) so increasingly complicated! Update Firmware was automated and fested with my HP and I still have problems for my new brother to update the firmware. Unfortunately, the brother's application and website to change the printer's characteristics, is so horrible, that I think it will be returning this, despite how increase that is hardware hardware senUti noc oditrapmoc ovihcra reliuqlauc ocinArtecele oerroc o duolCi ,sotof ed mubljA us ed sAvart a sotnemucod netrapmoc y nanecamla ,naenacse bew sanigjAp y ociffo fisorciM ed sovihcra ,FDP ,GEPJ rimirpmI der us ne onu ne odot y selbitapmoc saroserpmi etnemaenjAtnatsni nartneuc soicifeneb sol y sacitsAretracar sal .ojabart us ne esrartecnoc adeup euq arap ,nAiculus al someneT ?atisecen euq sotnemucod sol rarepse ©Aug ropzA ,secnotE ,ocinArtecele oerroc us atsah duolCi edsed ,eesed ednod olragrac arap onu ne odot o onacrec sjAm onamreh renjAcse us rasu edeup ,ritrapmoc o ebun al ne ranecamla aeed euq otnemucod nu eneit is ,Y ,anacrec sjAm aroserpmi us a etnematerid salraivne edeup ,Jeciffo fisorciM ed sovihcra o bew sanigjAp ,SFDPP ,SGEPJ omoc( ogla ed saserpni saipoc atisecen iS ,acirbmjAlani der us ne selbitapmoc rehtorB sovitisopsid sol sodot etnemacitjAmotua artneuc nacS & tniRPi ,diordnA y SoI elppa noc elbitapmoc ,sadarpronci senoicacilpa sarto euq nAiserpmi ed ojabart us erbos lortnoc sjAm ohcum adnirb el nacS & TNIRPI dadicavirp ed acitAlop senoicacilpa ed etropoS serodallorased ed bew oitis le sjAm odneidnerPA ,dade us o azillitu euq sacitsAretracar sal ed nAicnuf ne ,olpmeje rop ,rairav nedeup sotad ed dadicavirp ed sacitjArp sarto ed osu ed serodacifitnedi sol ed sotad sol :daditnedi us a odalucniv jAtse on orep ,sotad setneugis sol rallipocer nedeup es ,rodallorased led dadicavirp ed acitAlop al etlusnoc ,nAicamrofni sjAm renetho araP .nAicaunitnoc a ebircsed es omoc sotad ed ojenam le riulcni nedeup nAicacilpa al ed dadicavirp ed sacitjArp sal euq jAcidni ,.dtL ,seirtsudni rehtorB ,rodallorased iE ,otnup le se iAuc ,otisecen al odnauc licjAf y elpmis arenam ed alrasu odeup on is orep ,aniuqAm narG ,etnancipeced yuM ? nAicarugifnoc al railbmac arap setneretid sasoc 2 ne rartne otisecen ©Aug ropzA ?nAicacilpa al ne sadargetni aroserpmi al ed sacitsAretracar sal ratide omAc alortnoc euq bew oitis le se on ©Aug ropzA Brother Aquâ's application: iTunes App Store Google Play review the brother support website to see if your model supports Brother Mobile Connect.
